

# Insulated Conductor Rails/Bars

< English >

3-Pole Continuous Type (50/75/100/150A)	4-Pole Continuous Type (50/75/100/150A)	6-Pole Continuous Type (50/75A)

I-Single Pole Continuous Type (200A)	W-Single Pole Type (320 / 520A)

Ideal for all kinds of applications of :

- ? Cranes
- ? Monorails
- ? Automated Storage
- ? Retrieval Systems
- ? Mining Equipment
- ? Amusement Park Rides / Trams

## CAUTION

MAKE CERTAIN POWER SUPPLY IS DISCONNECTED BEFORE INSTALLING, REPAIRING, OR WORKING IN THE PROXIMITY OF ANY ELECTRICAL SYSTEM, ONLY QUALIFIED ELECTRICAL PERSONNEL SHOULD INSTALL OR REPAIR THESE PRODUCTS.

## Safety Current Table of Conductor Wire Assembling

Copper Conductor Wire			60C Insulator	75C Insulator	80C Insulator	90C Insulator
Category of Conductor Wire	Dimension mm <sup>2</sup>	No. of Wire / Diameter mm	Ampere Capacity (A)			
Single Wire		1.6	20			
		2.0	30			
		2.6	40			
Strand Wire	2.0	7/0.6	20			
	3.5	7/0.8	30			
	5.5	7/1.0	40			
	8	7/1.2	55	65	70	80
	14	7/1.6	80	95	100	110
	22	7/2.0	100	125	135	145
	30	7/2.3	125	150	160	170
	38	7/2.6	145	180	190	205
	50	19/1.8	175	210	220	245
	60	19/2.0	200	240	250	280
	80	19/2.3	230	285	300	330
	100	19/2.6	270	330	350	380
	125	19/2.9	310	380	400	440
	150	37/2.3	360	440	460	505
	200	37/2.6	425	520	550	600
	250	61/2.3	505	615	650	710
	325	61/2.6	590	720	760	830
	400	61/2.9	680	825	870	955
	500	61/3.2	765	930	985	1,080

It could affect the conductor wire safety current if the ambient temperature is over 35C

## Conversion Table of Horse Power

Full Load Current Table of 3 Phase Alternating Current (A.C.)			
H.P.	230V	460V	575V
1/2	2	1	.6
3/4	2.8	1.4	1.1
1	3.6	1.8	1.4
1-1/2	5.2	2.6	2.1
2	6.8	3.4	2.7
3	9.6	4.8	3.9
5	15.2	7.6	6.1
7-1/2	22	11	9
10	28	14	11
15	42	21	17
20	54	27	22
25	68	34	27
30	80	40	32
40	104	52	41
50	130	65	52
60	154	77	62
75	192	96	77
100	248	124	99
125	312	156	125
150	360	180	144
200	480	240	192

To select the proper current (Ampere) of Insulated Conductor Rails and Current Collector, please check the steps below :

1. Calculate the total motor's Horse Power (H.P.) required. (ex. 10 H.P.)
2. Make sure the rated voltage (A.C.). (ex. 230V)
3. Check the above Conversion Table of Horse Power to get the current. (ex. 28 Ampere)

# 3P.4P.6P Insulated Conductor Rails

6P

## Current Collector

Part No.	Rating	Weight (kg)	A	B
H303-30A	600V . 30Amp	0.27	71	461
H303-60A	600V . 60Amp	0.30	87	477

### Single Side Current Collector

### Double Sides Current Collector

? Double Sides Current Collector is used for the application in special design of irregular or circle connection at a large amount of current flow.

## Collector

? Collector is only for replacement that is a consuming parts of Current Collector.

Part No.	Rating	Weight (kg)
<b>H304-30A</b>	600V . 30Amp	0.065
<b>H304-60A</b>	600V . 60Amp	0.095

## Middle Power Feeding

? Middle Power Feeding is used for connecting the Insulated Conductor Rails that will be extended or the length of the Insulated Conductor Rails is over 100 meters to avoid voltage dropping.

Part No.	Type	Weight (kg)	A	B
<b>H305</b>	3P	0.22	70	61
<b>H405</b>	4P	0.31	90	81

## Supports

Part No.	Type	Weight (kg)	A
<b>H306-S</b>	3P	0.25	140
<b>H306-B</b>	4P / 6P	0.30	168

## Fix Square Bar

- H307 Fix Square Bar is used for 3P, 4P & 6P Insulated Conductor Rails System.
- HI07 Fix Square Bar is used for I -Type & W-Type Insulated Conductor Rails System.

Part No.	Weight (kg)	A	B
<b>H307</b>	0.63	13	230
<b>HI07</b>	0.80	25	310

# 3P . 4P . 6P

## Insulated Conductor Rails Outline Design

50Amp Insulated Conductor Rails is applied in a small type cranes (1~3 tons).  
150Amp Insulated Conductor Rails is applied in a multiple type cranes (5~10 tons).

### Side Installation

### Vertical Installation

# Supports Design

- The Side Installation is necessary if the 3P,4P,6P Insulated Conductor Rails is mounted at a radian.
- To install a Hanger Clamp in each 0.5 meter from the start point of the radian.

- The End Tension & Power In of 3P,4P,6P Insulated Conductor Rails have to be installed 5mm higher than the Hanger Clamp to avoid water flowing down to make short circuit.
- The weathered protection is required if 3P,4P,6P Insulated Conductor Rails is applied in outdoors.

## ① How to install End Tension & Power In

### Installation Procedures :

1. Insert Insulated Conductor Rails to the bottom of End Tension & Power In.
2. Use Screw Bolt M5X18L provided to fix Insulated Conductor Rails.
3. Connect Power Supply wire terminal with Copper Contact by Screw Bolt M6X8L, then place the Cover to complete the installation procedures.

- Fix End Tension & Power In at one side first, then pull Insulated Conductor Rails straight and fix it with the other End Tension & Power In at the other side.

## ② How to Install Hanger Clamp

- Fix Hanger Clamp on Supports by Washer and Nut.

- Push upward and mount Insulated Conductor Rails on Hanger Clamp.

- Slightly pry up Insulated Conductor Rails at both sides from Hanger Clamp by a flat screwdriver if necessary.

### ③ How to install Fix Square Bar and Current Collector

A

\* Fix Square Bar shall be installed in the center.

C

1. Mount Fix Square Bar on Cranes Construction by welding or screw bolt.
2. Fix Square Bar shall be installed in parallel with Insulated Conductor Rails.
3. Cut the length of Fix Square Bar if it is too long to use.

B

\* The most proper distance between Insulated Conductor Rails and Fix Square Bar is 95mm.

### ④ How to install Middle Power Feeding

A

? Cut off insulated plastic PVC material at 35mm from the end of Insulated Conductor Rails.

B

? Bend upward copper conductor material at a 90° vertical angle.

C

? Insert both sides of 90° vertical angle Copper Conductor into Middle Power Feeding and connect both sides of 90° vertical angle Copper Conductor by screwing up M6 Inner Hexagon screw bolt on U-shape Copper Connector.

# I -Type Insulated Conductor Rails

	B2	130mm

# Supports Design

## Installation Design for I-Type Insulated Conductor Rails in 30 meters

## Installation Design for I-Type Insulated Conductor Rails above 30 meters

## Line Case

## Curve Case

## Around type

## ? S ?type

## ① How to install I-Type End Tension & Power In

A

1. Cut off insulated plastic PVC material at 90mm from the end of I-Type Insulated Conductor Rails.
2. Put Washer and Terminal Plate into Copper Conductor material of I-Type Insulated Conductor Rails, then bend backward Copper Conductor material and touch with Terminal Plate.
3. Place Cover on and complete.

B

1. Connect Power Cable Wire with Terminal Plate and then place Cover on I-Type Insulated Conductor Rails.

**Use I-Type Fixed End Insulator instead of I-Type End Tension & Power In if the total length of I-Type Insulated Conductor Rails is installed in 30 meters.**

? Drill a hole f 5 at 13mm from the end of I-Type Insulated Conductor Rails for inserting Pin 5x20.

## ② How to install I-Type Hanger Clamp

A

1. Take out Plastic Clip from Metal Clip first.

B

2. Mount Plastic Clip on I-Type Insulated Conductor Rails and then install it together on Metal Clip.

C

3. Use tool to clip inward Plastic Clip and pull I-Type Insulated Conductor Rails out together if necessary.

### ③ How to install I-Type Fix Square Bar and I-Type Insulated Conductor Rails.

A

B

1. I-Type Fix Square Bar shall be installed in parallel with I-Type Insulated Conductor Rails.
2. Cut the length of I-Type Fix Square Bar if it is too long to use.

#### \* Caution:

1. It is not allowed to incline over 10° when install I-Type Insulated Conductor Rails.
2. If I-Type Insulated Conductor Rails still incline after installation, then it is required to adjust forcibly.

### ④ How to install I-Type Middle Power Feeding.

A

B

1. Cut off 80mm long of insulated material PVC in the middle of I-Type Insulated Conductor Rails for supplying power.
2. Contact Copper Conductor of I-Type Insulated Conductor Rails by two piece of Copper Plate and fix it by M6 inner hexagon screw bolt.
3. Drill two holes 5mm through both Copper Plate and Copper conductor of I-Type Insulated Conductor Rails at the bottom and insert pins to connect and fix them.

1. Connect Power cable wire and screw up Cover.
